

Environmental Change

Level 3:

- Do you know how people can improve the environment?
- Can you give some views about environmental issues?

Level 4:

- Can you describe how people improve and damage the environment?
- Can you explain different views about environmental issues?

Level 5:

- Can you explain how people affect the environment?
- Can you explain different views about environmental issues?
- Can you see how people try to manage the environment?

Level 6:

- Can you describe and explain how people try to manage the environment?
- Can you see that the action people take in one place can affect the environment in other places?

Level 7:

- Do you understand the effect people have on the environment, sometimes without meaning to, and the disagreements this can cause?
- Can you show you understand that the environment in one place is affected by people's actions and events in different places?
- Do you understand what is meant by sustainable development?

Level 8:

- Can you recognise the causes and effects of environmental issues?
- Do you understand the different ways to try to solve environmental problems?
- Can you use the idea of sustainable development in your work?
